CEO Message

First of all, I wish to welcome you and thank you for visiting the virtual world of Ali Enterprises. From all kinds of rubber parts in 2002 to medium and large size Rubber, Plastic & Sheet Metal Parts today, Ali Enterprises has traveled a journey of synchronized untiring & persevering struggle of our team of dedicated & target oriented professionals and ALHAMD-O-LILLAH acquired an unrivalled status in the industrial Sector of Pakistan. We have authentically proven our logo, "Remember, A Mark of Quality"

Our technical capabilities and management competencies are expanding to take over the best out of this huge and ever growing industrial market in an intensely competitive industry and aimed challenging markets and economic conditions, Ali Enterprises, is steadily moving forward in the right direction. And, finally we believe we have many good years and a great future ahead of us to grow Ali Enterprises, into a world class organization with key focus on people, processes and products thus making this organization, one of the most admired companies in the world.

I have very confidence that dedication and spirit of our team will go forward. I am certain that each company will fly high with a sustainable focus on improving products, practices and people's lives. The company that survives longest are the one's that work out what they uniquely can give to the world-not just growth or money but their excellence, their respect for others and their ability to make people happy.

I have learnt, "Nothing stops an organization faster than people who believe that the way you worked yesterday is the best way to work tomorrow"

Thank you.

PRODUCTS SPECIALTY

Canvas Seals

We manufacture and supply canvas seal made from high-grade raw material. These Canvas Seals are used in packaging process in several engineering industries. We manufacture the range of canvas seals as per the industry quality standards. Because of its high quality they are widely demanded by the customers. Our range of canvas seal is durable and is long lasting. These seals are available in various specifications as per the demand of the client at industries leading prices.

Features **Durable** **High quality** **Industries leading prices**

Oil Seals

Our company is enlisted amongst the leading top companies in the industry. We are offering an extensive range of Oil Seals. These oil seals have optimum quality and exceptional finishing. The oil seals offered by our company have excellent malleability; they are fire retardant in nature. These oil seals are best for various industrial applications. They are offered at an economic price.

Features **Exceptional Finishing** **Fire Retardant** **Malleability**

Polyurethane Seals

We have developed the polyurethane seals for has excellent abrasion resistance. Polyurethane seals are one of the most common elastomers used in industries having high levels of abrasion. Polyurethane is the product that is very versatile in nature. They are available in various degrees of hardness and colors. We can customize this range of polyurethane seals as per the requirement of the client.

Features **Versatile in Nature** **Excellent Abrasion Resistance**
Customized Range

PRODUCTS SPECIALTY

Carbon Seals

We are offering a wide selection of grades and sizes of carbon seals. They are hard in nature therefore they ensure long life of the product, these carbon seals are also resistant to wear, and self lubricating. They have low coefficient of friction. These carbon seals are resistance to chemicals, corrosion, and oxidation. These carbon seals are self lapping and are flexible enough to conform to the mating face. They are also self lubricating.

Features **Low coefficient of Friction** **Resistance to Chemicals, Corrosion and Oxidation Self Lubricating**

Spare Tyre Couplings

Keeping in mind the diverse requirements of the clients, we are into manufacturing and supplying technically advanced range of Spare Tyre Couplings. Our entire product range is durable and reliable in nature. Our entire product range is in compliance with set quality standards and policies. Our entire product range is fabricated as per the preferences of our discerning clients.

Features **Reliable** **High quality** **Good finish**

Diaphragms

Our company holds expertise in manufacturing and supplying a quality tested range of Diaphragms. They have capacity to tolerate high heat and gives excellent performance. We offer them in varied sizes and dimensions as per the demand .they can be customized as per the functional area of the work. They can be used for industrial and commercial applications. They are available in different shapes and sizes.

Features **Capacity to tolerate high heat** **Excellent performance**

PRODUCTS SPECIALTY

Ptfe Diaphragm

We are offering high quality Teflon diaphragms which are manufactured from high grade of raw material. Our Teflon diaphragms are appreciated by our clients because of it enormous salient features. It has great operational accuracy that helps in its use in various industries. As per our esteemed client's convenience, they can be customized according to their requirements. We are offering this product within affordable price range.

Features **Enormous salient features** **Great operational accuracy**
Affordable price rang

Butterfly valve rubber sleeve

We are engaged in offering butterfly valve rubber sleeves, that are available in different size ranging from 1" to 36" (25mm to 900mm). These are manufactured using quality material for EPDM, neoprene, silicon, nitrile, viton. more...

Rubber Gaskets

We are offering an exclusive range of Rubber Gaskets that is used for sealing gaps between two objects even under pressure. This helps in avoiding leakage between two objects. These gaskets are made utilizing high quality rubber and work effectively to maintain a block under pressure and temperature changes. The space for which these Gaskets get designed is tightly sealed and not even a slight irregularity is found.

PRODUCTS SPECIALTY

Seal Star Coupling

Our offered range of Seals Star Coupling caters to the requirements of diverse industries. We offer best quality star coupling and lovejoy coupling that are made using high quality raw material. The star coupling (spiders) has the feature to withstand dust, atmospheric conditions and water. Whereas our lovejoy couplings are easy to install and can be fitted in generator sets, reciprocating pumps, diesel & gas engines and various similar drives.

Anti-Vibration mounting

We are manufacturer and supplier of Anti-vibration Mounting Pad are ready to use for Workshop Machineries. No need of foundation, foundation Bolt, grouting, anchoring etc. It is very fast for installation of any Workshop Machineries. A height adjustment & precise leveling features are provided. It will provide excellent mobility of machinery layout in workshop. It insulate high frequency vibration, sound & prevent wondering of machineries due to the large area of contact with the floor and keeps the machineries in position firmly.

Industry Wise Usage: Earth Moving Industries

- *Plastic Industries
- *Pump Industries
- *Hydraulic Industries
- *Engine Mounting of various types
- *Machine Tools Industries
- *Pharmaceuticals Industries
- *Air Blower Plant

PTFE and Teflon Products

Being a reliable brand, we are committed to offer an extended range of PTFE / Teflon Products. These parts are in great demand in different Industries like automobile, railways, pumps and other allied industries. Our highly equipped machinery and expert super vision ensure durability, reliability and low maintenance cost of these parts.

PRODUCTS

SPECIALTY

Concrete pumps piston/ram

We offer a wide range of concrete pumps spare parts such as Concrete Pumps piston that are manufactured using best quality of metal alloys and advanced technology to ensure durability and efficiency. Our range is equipped with concrete pumping RAM/Piston. Made for different pumps in sizes DN 180, DN 200, DN 210, it gives long life for pumping the concrete as it is made from high quality rubber and highly durable core.

Features **Abrasion resistant** **Longer functioning life**

"Earth moving machineries" Isolators / Buffers

Ali enterprises supplies a comprehensive range of rubber isolators (or buffers) for Vibratory Rollers, excavator mounted vibratory compactors and pile drivers. All our Isolators are made from top quality tear resistant rubber with different degrees of hardness available for different applications. In addition the steel plates are electroplated and enameled to prevent rusting. Feature: Choose our Isolators / Buffers for: Easy Fit Superb Vibration Absorption Top quality at competitive prices

Rubber Track Pad

Rubber track pads are for sensor paver Machine and Excavator. Track pads manufactured in the medium also manufactured in the medium grade polyurethane the best qualities of polyurethane and high quality rubber provide a durable and long life. Track pad are conventional and interchangeable short pitch types. These pads are designed for low ground pressure application in constructional and agricultural equipment's.

PRODUCTS

IMPORTED

Rubber Sheets

We manufacture a wide range of Rubber Sheets made from a variety of rubber grades like Natural, Silicon, EPDM, Nitrile, Butyl, Chloroprene and others. These sheets are available with or without canvas/nylon insertions. Depending upon the requirement of our customer, we manufacture the sheets in various sizes & thickness with both smooth and textured finishes.

Advantages & Applications :

Temperature resistance, electrical resistance, abrasion resistance, steam and other jointing gaskets and packing material, food grade sheets, hospital sheets, flame retardant sheets, insertion sheets, etc.

High Pressure Spray Pype Hose

PRODUCTS

IMPORTED

S.S Steem Flexible Hose Pipe

Features

High tensile strength

No folds and damages

We are the leading organization in the industry to offer the best quality range of S S Flexible Hose Pipe. The offered pipe is manufactured from high grade material and high-end techniques at our sound production plant. This pipe is available in different sizes, lengths and fitting configurations. Widely acclaimed for sturdiness and high resistance against corrosion, our flexible hose pipes are available in standard as well as customized specifications.

Advantages of Flexible S S hose pipes:

- Suitable for wide temperature range (-200C to 700C)
- Compensates for thermal expansion contraction in the piping system
- High physical strength
- Fire resistant, Longer life, Moisture resistant
- Good corrosion characteristics
- Resistant to abrasion, penetration and damage
- Connects misaligned rigid piping absorbs or dampens vibration and similar equipments
- A flexible and quick option for rigid piping absorbs or dampens vibration and similar equipments
- A flexible and quick option for rigid piping in difficult locations

PRODUCTS

IMPORTED

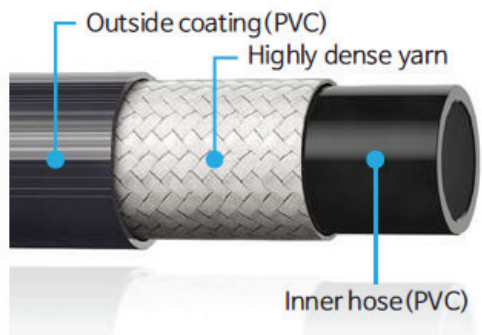

High Pressure Hydraulic Hose Pipe

While climbing on the success ladder, it has become increasingly important for us to deliver precisely tested and high grade assortment of High Pressure Hydraulic Hose Pipe. The provided hose pipes are manufactured as per the set industry norms using quality approved raw materials. Keeping in mind the diverse requirements of our clients, we provide entire range in various sizes and specifications. Clients can avail the entire range from us at industrial leading prices.
